

— Making Asthma monitoring a breeze

# FeNOmino – the first holistic asthma prediction and monitoring system in the palm of your hand

## Manage your drugs

With our 3-gas analytics system in a hand-sized case you can optimize your drug dosage with a simple breath.

## Predict asthma attacks

By cross-referencing weather with your respiratory health data we can predict asthma attacks even before they occur.

## Make the most of your doctor's visits

Save yourself some time and provide all the data your doctor needs to give you the best treatment possible – simple, objective and secure.
